

When seeking drug or alcohol screening for court related purposes, why not go to the source that specialized in forensic drug screening administrative services?

Twenty years of providing quality, evidentiary drug and alcohol screening administration services to courts, probation officers, government, social service agencies, attorneys and employers.

## Why use Span Corporation?

**Availability** - Span maintains over 130 collection sites throughout Michigan, and over 4000 throughout the US, many with extended hours up to twenty four hours per day, seven days per week. Most are on bus lines, so even working clients and clients with transportation difficulties can complete their screening on time. Most offer walk-in service.

**Accuracy** – Span collection facilities employ only SAMHSA certified collectors working under strict federally mandated chain of custody procedures. Span's laboratories are all SAMHSA certified, which means they meet the highest standards for accuracy. All prospective drug screen results go through a second, completely different testing process to confirm the results. This process, called GCMS, is the forensic Gold Standard and is the only defensible technology recognized in the judicial process.

**Convenience** - No need to contact the individual collection sites for screening. One call or fax to Span takes care of it all. Use that same phone number to discuss results, general questions, billing questions, or any other drug screen related need. One source for all your drug screening issues.

**Simplified billing** - Once per month, Span will invoice you for your client's drug screens. Each client's screens will be in a separate invoice packet. Each packet will consist of the invoice, copies of all completed drug screens, a copy of the Compliance Record (if used) and a completed internal forms required by your processing, which you don't have to prepare--Span does it for you.

**Knowledge Support** - If you need advice deciding on which kind of drug screen to do, need a collection location, call Span. If you have questions about a drug screen report or difficulty reading results, have medication question, or require any form of technical or procedural information, give us a call. Put our 20 years plus of experience in drug screen management to work for you.

**Value** – Span is committed to providing the greatest value for the dollar available in the industry today. Our drug use detection solutions will provide return in terms of service, accuracy, information and court readiness at the lowest cost per case available in the industry today.

## Forensic Drug Screen Administration for the Courts

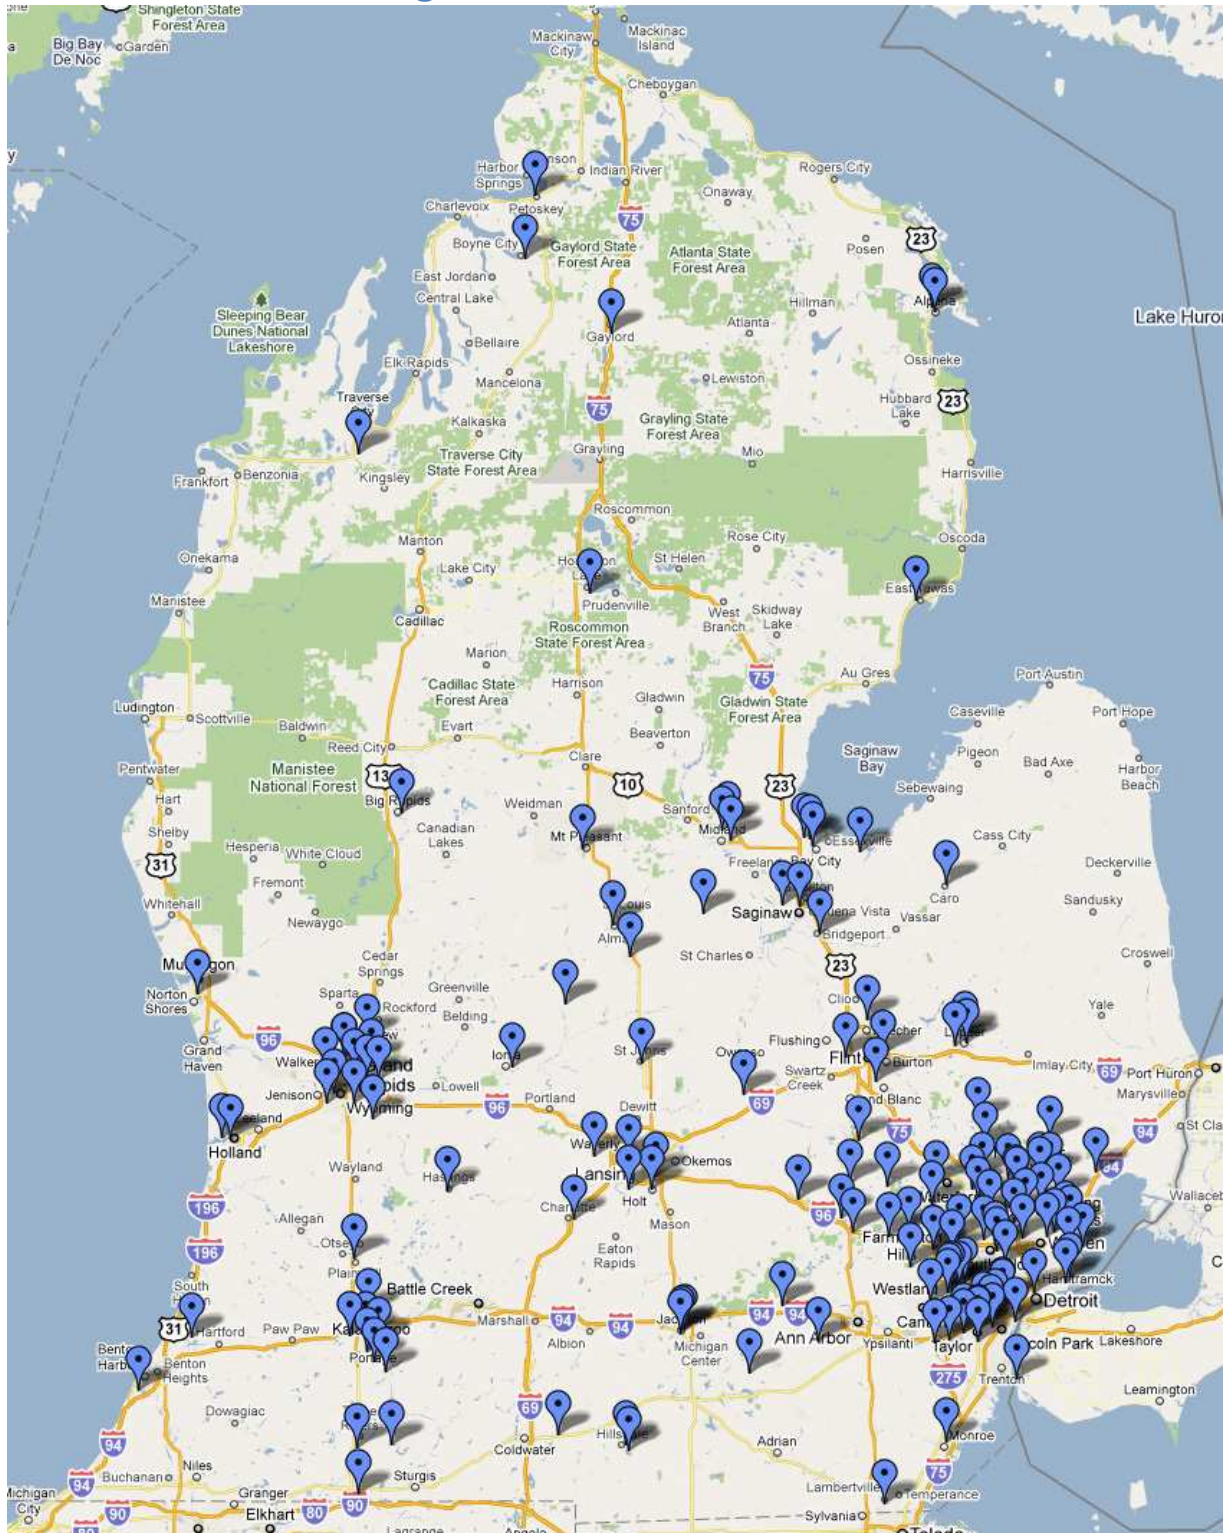

Span Corporation has been providing court-centric drug screen administration in Michigan for over 20 years. Unlike most drug screen administrators we specialize in court related drug screening services, designed to meet the unique needs of the courts, parole officers, case managers, and professionals involved in child and family services, rehabilitation, probation, parole and prisoner re-entry programs.
